Covers repair maintenance and service for gasoline engines up to and including twenty horsepower, Engines included are Briggs and Stratton, Clinton, Kawasaki, Kohler, and Tecumseh. This is the story of the elite Japanese Army Air force (JAAF) aces that flew the Kawasaki Ki-61 Hien (Swallow), and the Ki-100 Goshikisen in the Pacific Theatre of World War 2. The former, codenamed 'Tony' by the allies, was a technically excellent aircraft, possessing power, stability and a good rate of climb - differing radically from the usual Japanese philosophy of building light, ultra-maneuvrable fighters. Its pilots soon realised, however, that the type was plagued by a number of dangerous mechanical issues. Then as the war moved relentlessly closer to Japan's doorstep, a desperate, expedient innovation to the Ki-61 airframe by fitting it with a radial instead of inline engine resulted in one of the finest fighters of World War 2 - the Ki-100. This book uses the latest findings to provide a gripping account of some of the most remarkable and hard-pressed fighter pilots of the war. It reveals how these men, unlike so many of their unfortunate late-war colleagues, could surprise Allied aircraft in high-performance fighters and claim successes in the face of enormous odds.
