Singapore had been one of the nations severely affected by the 2008-09 global financial and economic crisis. The city state came under pressure through the financial, trade, and confidence channels. To counter these shocks, Singapore policymakers undertook unprecedented monetary and fiscal policy measures. They subsequently charted a revival strategy that would help the country emerge stronger after the crisis. These all-encompassing policies together with the global economic recovery in 2009 helped the city state bounce back faster and stronger than many other regional economies. This book provides an insight into the events that occurred during the crisis and Singapore's successful navigation to economic recovery. "Although much has been written about the global financial crisis of 2008-09, not enough has been said about how it affected Singapore and the policy response. In this highly readable book, Sanchita Basu Das fills this gap, explaining how the crisis rippled through the Singapore economy via trade channels, the financial sector, and asset markets. But the greatest strength of this volume is its comprehensive account of the extraordinary measures Singapore put in place to deal pre-emptively with what could have been huge declines in output and employment in the face of the collapse of trade and credit flows. Singapore's multi-pronged approach, and especially the fiscal support and loan guarantees contained in the 2009 budget, must go down as one of the boldest and most creative policy responses to a crisis. It is a valuable lesson to economics students and practitioners alike. This book gives you the full story." -Vikram Khanna, Associate Editor, The Business Times "Sanchita Basu Das is to be congratulated for providing a fascinating, accessible, and forward-looking analysis of Singapore's response to the global economic crisis of 2008-09. As a highly trade-dependent economy, Singapore was hit hard by these events. But the government was nimble and quick to react. The author describes and evaluates this response, and draws out general lessons for crisis management and mitigation in small open economies. Highly recommended." -Hal Hill, H.W. Arndt Professor of Southeast Asian Economics, Australian National University."This is a comprehensive account of the impact of the global financial crisis on Singapore -- one of the most open economies in the world -- and policy responses by the government and central bank. The book identifies the need to move to a more knowledge-intensive economy as the key policy challenge for post-crisis Singapore." -Masahiro Kawai, Dean and CEO, Asian Development Bank Institute "Singapore was affected disproportionately by the global economic crisis of 2008-09. While it is currently rebounding impressively, government officials and the private sector would do well to learn from the crisis experience in devising future policies. Moreover, the Singapore experience is instructive as to how external economic shocks can be transmitted to open economies and, hence, has great relevance beyond its borders. This book by Sanchita Basu Das gives a comprehensive survey of Singapore in crisis and provides a wealth of information and insightful analysis, using clear, non-technical language. It is extremely useful contribution to scholars, policymakers, and other students of Asian economics." -Michael G. Plummer, Organisation for Economic Co-operation and Development (OECD) International GAAP® 2016 is a comprehensive reference tool to interpreting and implementing International Financial Reporting Standards (IFRS) and provides detailed analysis of how complex financial reporting problems can be addressed appropriately and effectively. It demonstrates how difficult practical issues should be approached in the new complex global world of international financial reporting, where IFRS has become the accepted financial reporting system in more than 100 countries. The International Financial Reporting Group of Ernst & Young (EY) includes financial reporting professionals from around the world. Complex technical accounting issues are explained clearly in a working context that enables immediate understanding of the point at issue. It is accompanied by numerous worked examples, a comprehensive discussion of the practical issues of the day and the possible alternative options available, and hundreds of illustrations taken from the actual financial statements of companies that report under IFRS. The volumes cover the International Accounting Standards Board's (IASB) conceptual framework, financial statements, accounting policies, non-current assets held for sale and discontinued operations, consolidated financial statements, foreign exchange, inflation, intangible assets, leases, government grants, income taxes, share-based payment, statement of cash flows, hedge accounting, IAS 39, IFRS 9, insurance contracts and others. A substantially updated new edition of the essential text on financial modeling, with revised material, new data, and implementations shown in Excel, R, and Python. Financial Modeling has become the gold-standard text in its field, an essential guide for students, researchers, and practitioners that provides the computational tools needed for modeling finance fundamentals. This fifth edition has been substantially updated but maintains the straightforward, hands-on approach, with an optimal mix of explanation and implementation, that made the previous editions so popular. Using detailed Excel spreadsheets, it explains basic and advanced models in the areas of corporate finance, portfolio management, options, and bonds. This new edition offers revised material on valuation, second-order and third-order Greeks for options, value at risk (VaR), Monte Carlo methods, and implementation in R. The examples and implementation use up-to-date and relevant data. Parts I to V cover corporate finance topics, bond and yield curve models, portfolio theory, options and derivatives, and Monte Carlo methods and their implementation in finance. Parts VI and VII treat technical topics, with part VI covering Excel and R issues and part VII (now on the book's auxiliary website) covering Excel's programming language, Visual Basic for Applications (VBA), and Python implementations. Knowledge of technical chapters on VBA and R is not necessary for understanding the material in the first five parts. The book is suitable for use in advanced finance classes that emphasize the need to combine modeling skills with a deeper knowledge of the underlying financial models. 'There is no justice in Guinea-Bissau' many people lament in this West African country. Impunity and legal uncertainty tend to mark their interactions with judges, regulos (chiefs), police officers, or imams when they have become involved in a dispute. Based on case analysis, this book analyzes dispute settlers' self-presentations, stories told of them, and aggrieved parties' agency in semi-rural Guinea-Bissau. By introducing a typology of dispute settlers, as well as the concepts of person-bound dispute settlement and supporter activation, this book contributes to debates in legal anthropology. Dissertation. (Series: Contributions to African Research / BeitrÄ?Änge zur Afrikaforschung, Vol. 72) [Subject: African Studies, Legal Anthropology] Beyond the Enclave sets out to unravel the contradiction of a country, Zimbabwe, where a rich, diverse resource base co-exists with endemic poverty. One reason lies in the colonial economy, which was predicated on an ideology of white supremacy, creating an enclave formal economy employing one-fifth of the labour force. Yet over three decades after independence, the non-formal segment has become even more entrenched. This book assesses Zimbabwe's economy through three main phases: 1980-90 when a strong social policy framework proved difficult to sustain due to erratic growth, and 1991-96, when structural adjustment demanded a market-driven approach to development. The third phase is characterized by crisis-management leading to policy inconsistencies and reversals. Not surprisingly, such incoherence saw the economy descend into hyperinflation and paralysis in 2007-2008, leading to the signing of the Global Political Agreement in September 2008. In the absence of formal dollarization, economic recovery after the adoption of the multi-currency regime has remained fragile, leaving an estimated 70 per cent of the population outside the banking system. This has further entrenched uneven (enclave) growth as the economy remains locked in a low-income poverty trap. There is a need to facilitate transition towards formality to promote decent jobs. Furthermore, a strategic, developmental role for the state in the economy is now widely recognized as vital for development. Beyond the Enclave argues for a new approach to development in Zimbabwe based on pro-poor and inclusive strategies, which will contribute to the well-being of all of its citizens and wise stewardship of its resources. It offers suggestions on policy formulation, implementation, monitoring and evaluation in all sectors, designed to promote inclusive growth and humane development. The Yearbook of Muslims in Europe provides up-to-date factual information, statistics and analysis of the situation of Muslims in 46 European countries. Progress in Physics has been created for publications on advanced studies in theoretical and experimental physics, including related themes from mathematics. Discover the latest ICH news from international experts in the pharmaceutical industry, academia, and regulatory bodies. The recent International Conference on Harmonisation (ICH) revisions of regulatory requirements for quality, nonclinical, and clinical pharmaceutical product registration are the focus of this timely update. This cutting-edge resource includes the major headings in the modular structure of the Common Technical Document (CTD), which is now the agreed format for product information submission. The format, specification, and technical requirements of the e-CTD, the electronic version of CTD, are also thoroughly discussed. The book is organized into six highly practical segments: Part I: CTD, eCTD, Module 1, and Environmental Risk Assessment Part II: CTD Summaries Part III: Quality Topics Part IV: Nonclinical Topics Part V: Clinical Topics Part VI: Other Topics (including drug-device combination products) This text is a must-have for those in the pharmaceutical industry determining regulatory requirements for the major world markets in Europe, the US, Canada, and Japan. Steigende Rohstoffpreise treffen die produzierende Wirtschaft auf der gesamten Beschaffungsseite. Banken haben die Möglichkeit, ihren Firmenkunden die Absicherung von Marktpreisrisiken mittels Rohstoffderivaten anzubieten. Sie können mit dem Verkauf dieser Instrumente einerseits Erträge generieren und andererseits - da viele Institute dieses Geschäftsfeld noch nicht aktiv besetzt haben - ein wertvolles Alleinstellungsmerkmal bei ihren Kunden erlangen. Ein kompetenter Verkauf ist jedoch nur bei dezidiertem Kenntnis der zugrunde liegenden Marktzusammenhänge möglich. Roland Eller und sein Team sind sowohl in fachlicher wie in didaktischer Hinsicht anerkannte Experten in der Kreditwirtschaft. In diesem Buch vermitteln sie das erforderliche Know-how zu Strategien, Chancen, Risiken, Märkten sowie Produkten und machen so die Verantwortlichen in Banken und Unternehmen handlungsfäh. Since the 1990s, Baltic-Russian relations have been amongst the most contentious on the European continent. Energy security concerns, historical legacies, and the status of Russian minorities have all proved key flash points. Baltic-Russian relations have been described as a 'litmus test' of Russia's willingness to leave behind its imperialist ambitions; simultaneously the policies of Tallinn, Riga or Vilnius towards Russia can have a direct impact on EU-Russian and NATO-Russian relations. The Baltic states share similar histories and resources, and face the same geopolitical challenges. All are dependent on Russia for energy yet, as this fascinating study reveals, they have pursued very different foreign policies towards their powerful neighbour. In The Politics of Energy and Memory between the Baltic States and Russia Agnia Grigas provides an unprecedented analysis of contemporary Baltic-Russian relations and identifies the causal factors that drive the foreign policies of the Baltic states in such divergent routes. Supported by case studies on the oil and gas sectors as well as the tug of history, this book is an invaluable resource for scholars and policy makers. Stanley Mandelstam (1928–2016) was one of the most influential and respected particle theorists. Coming as a young chemical engineer from South Africa to study theoretical physics in England, he quickly became a leading physicist in his field. With his deep understanding of quantum field theory, he pioneered the development of the analytic S-matrix theory as well as the path-dependent formulations for quantum gauge theories and for quantum general relativity. They are being actively used for the electroweak theory and having their imprints in lattice gauge theory and loop quantum gravity. Also he elucidated the mechanisms for quark confinement in quantum chromodynamics, constructed non-perturbative bosonization methods in 1+1 dimensions, and proved the perturbative finiteness and $\beta=0$ of N=4 supersymmetric Yang–Mills theory. His work also led to the discovery of dual resonance models, which in turn became superstring theory. He was a leader in these developments, devoting much of his later years to the proof that the theory is perturbatively finite so it can be considered as a contender for the theory of quantum gravity. He was also a very modest and friendly man, impressing everyone with his sharp intellect as well as his humanity. This volume contains essays written by many of his friends and students, including both detailed reports on his scientific achievements as well as personal reminiscences. Also collected in the volume are some selected reprints of Mandelstam's early seminal papers and abstracts of selected papers representing the full spectrum of his contributions. Contents: Recollections of Stanley Mandelstam (Geoffrey Chew) Scientific Biography of Stanley Mandelstam: 1955–1980 (Charles B Thorn) Scientific Biography of Stanley Mandelstam: 1981–2016 (Nathan Berkovits) Stanley Mandelstam: Brief Biography and Selected Publications with Commentary (Ling-Lie Chau) Stanley Mandelstam: The Early Years at a 'Most Stimulating Theoretical Group' (Sabine Lee) The Guiding Influence of Stanley Mandelstam, from S-Matrix Theory to String Theory (Peter Goddard) Remembering Stanley: From a Source of Inspiration to a Fair Strong Competitor (G Veneziano) Stanley Mandelstam and Me and Life on the Light-cone (Lars Brink) Reminiscences of Stanley Mandelstam (John H Schwarz) Stanley Mandelstam and My Postdoctoral Years at Berkeley (Steven Frautschi) Reminiscences on Stanley Mandelstam (Korkut Bardakci) Remembering a Gentle Giant of Physics (Charles Sommerfeld) Grad School with Stanley Mandelstam (Joseph Polchinski) Remembering a Gentle Giant of Physics (Mary K Gaillard) Mandelstam & NAL (Pierre Ramond) The Influence of Stanley Mandelstam (Michael B Green) My Interaction with Stanley Mandelstam (Paolo Di Vecchia) My Advisor Stanley (Sang-Jin Sin) Stanley Mandelstam My Graduate Supervisor (Arjun Berera) Reprints and Abstracts of Selected Publications: The Mandelstam Representations in the Mandelstam Variables for S-Matrices: Determination of the Pion-Nucleon Scattering Amplitude from Dispersion Relations and Unitarity. General Theory Analytic Properties of Transition Amplitudes in Perturbation Theory Two-Dimensional Representations of Scattering Amplitudes and Their Applications The S-Matrix Approach: Theory of Low-Energy Pion–Pion Interactions Dispersion Relations in Strong-Coupling Physics The Mandelstam Path-Field Formulation for Quantum Gauge Theories and Feynman Rules: Quantum Electrodynamics Without Potentia Praktisch handboek voor ondernemers voor de opstelling van een marketingplan. As the cleanest source of fossil energy with the most advantageous CO2 footprint, natural gas continues to increase its share in the global energy market. This book provides state-of-the-art contributions in the area of gas processing. Special emphasis is given to Liquefied Natural Gas (LNG); the book also covers the following gas processing applications in parallel sessions: * Natural Gas processing and treatment * Gas To Power and water * Gas To Liquid (GTL) * Gas To Petrochemicals, including olefins, ammonia and methanol * Provides a state-of-the-art review of gas processing technologies * Covers design, operating tools, and methodologies * Includes case studies and practical applications This authoritative new resource provides a comprehensive review of the current approaches to the design and construction of sustainable buildings. This hand-on guide features global case studies with practical examples of both successful and unsuccessful designs. The whole system approach to integrated design is clearly presented. This book includes insight into designing for the future, including design quality and future proofing, intelligent buildings, and whole life value. Nature inspired sustainable designs that can be mimicked in the construction industry are presented. Technical challenges such as energy efficiency, design, and computer modeling are explored along with various construction phase opportunities. IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special; and that is why International GAAP® 2015 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP® 2015 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP® 2015 deals with a key area of IFRS and has a common structure for ease of use: • An introduction to the background issues • An explanation of relevant principles • A clear exposition of the requirements of IFRS • A discussion of the implications in practice and possible alternative solutions available • Worked examples • Extracts from real company accounts • A full listing of the required disclosures Human health depends to a great extent on our nutritionally balanced food supply consistent with the evolutionary aspects of diet to which genes were originally programmed to respond. The publication at hand contains selected papers from the Inaugural Conference Healthy Agriculture, Healthy Nutrition, Healthy People of the World Council on Genetics, Nutrition and Fitness for Health held at Ancient Olympia, Greece, in October 2010. Topics include the relationship between architecture and agriculture, food production systems and urban agriculture, as well as physical activity, nutrition, genetic variation and other determinants of human health. The papers clearly show that optimal nutrition is consistent with ecologically and economically sustainable agriculture, and that there is a need for scientific and political institutions that can integrate research into urban planning and its regulation, agriculture and health care systems. This will contribute to normal development and health throughout the human life cycle, and prevent or delay chronic diseases such as obesity, type 2 diabetes, cardiovascular disease and cancer. Scientists working in the fields of medicine, physiology, genetics, nutrition, dietetics, economics, architecture, agriculture as well as scientists and policy makers interested in environmental issues such as agricultural sustainability and climate will find this volume of great interest. Ending the U.S. war in Iraq required redeploying 100,000 military and civilian personnel; handing off responsibility for 431 activities to the Iraqi government, U.S. embassy, USCENTCOM, or other U.S. government entities; and moving or transferring ownership of a million pieces of property in accordance with U.S. and Iraqi laws, national policy, and DoD requirements. This book examines the planning and execution of this transition. Written by leading market risk academic, Professor Carol Alexander, Pricing, Hedging and Trading Financial Instruments forms part three of the Market Risk Analysis four volume set. This book is an in-depth, practical and accessible guide to the models that are used for pricing and the strategies that are used

for hedging financial instruments, and to the markets in which they trade. It provides a comprehensive, rigorous and accessible introduction to bonds, swaps, futures and forwards and options, including variance swaps, volatility indices and their futures and options, to stochastic volatility models and to modelling the implied and local volatility surfaces. All together, the Market Risk Analysis four volume set illustrates virtually every concept or formula with a practical, numerical example or a longer, empirical case study. Across all four volumes there are approximately 300 numerical and empirical examples, 400 graphs and figures and 30 case studies many of which are contained in interactive Excel spreadsheets available from the the accompanying CD-ROM . Empirical examples and case studies specific to this volume include: Duration-Convexity approximation to bond portfolios, and portfolio immunization; Pricing floaters and vanilla, basis and variance swaps; Coupon stripping and yield curve fitting; Proxy hedging, and hedging international securities and energy futures portfolios; Pricing models for European exotics, including barriers, Asians, look-backs, choosers, capped, contingent, power, quanto, compo, exchange, 'best-of' and spread options; Libor model calibration; Dynamic models for implied volatility based on principal component analysis; Calibration of stochastic volatility models (Matlab code); Simulations from stochastic volatility and jump models; Duration, PV01 and volatility invariant cash flow mappings; Delta-gamma-theta-vega mappings for options portfolios; Volatility beta mapping to volatility indices. The requirements for multimedia (especially video and audio) communications increase rapidly in the last two decades in broad areas such as television, entertainment, interactive services, telecommunications, conference, medicine, security, business, traffic, defense and banking. Video and audio coding standards play most important roles in multimedia communications. In order to meet these requirements, series of video and audio coding standards have been developed such as MPEG-2, MPEG-4, MPEG-21 for audio and video by ISO/IEC, H.26x for video and G.72x for audio by ITU-T, Video Coder 1 (VC-1) for video by the Society of Motion Picture and Television Engineers (SMPTE) and RealVideo (RV) 9 for video by Real Networks. AVS China is the abbreviation for Audio Video Coding Standard of China. This new standard includes four main technical areas, which are systems, video, audio and digital copyright management (DRM), and some supporting documents such as consistency verification. The second part of the standard known as AVS1-P2 (Video - Jizhun) was approved as the national standard of China in 2006, and several final drafts of the standard have been completed, including AVS1-P1 (System - Broadcast), AVS1-P2 (Video - Zengqiang), AVS1-P3 (Audio - Double track), AVS1-P3 (Audio - 5.1), AVS1-P7 (Mobile Video), AVS-S-P2 (Video) and AVS-S-P3 (Audio). AVS China provides a technical solution for many applications such as digital broadcasting (SDTV and HDTV), high-density storage media, Internet streaming media, and will be used in the domestic IPTV, satellite and possibly the cable TV market. Comparing with other coding standards such as H.264 AVC, the advantages of AVS video standard include similar performance, lower complexity, lower implementation cost and licensing fees. This standard has attracted great deal of attention from industries related to television, multimedia communications and even chip manufacturing from around the world. Also many well known companies have joined the AVS Group to be Full Members or Observing Members. The 163 members of AVS Group include Texas Instruments (TI) Co., Agilent Technologies Co. Ltd., Envivio Inc., NDS, Philips Research East Asia, Aisino Corporation, LG, Alcatel Shanghai Bell Co. Ltd., Nokia (China) Investment (NCIC) Co. Ltd., Sony (China) Ltd., and Toshiba (China) Co. Ltd. as well as some high level universities in China. Thus there is a pressing need from the instructors, students, and engineers for a book dealing with the topic of AVS China and its performance comparisons with similar standards such as H.264, VC-1 and RV-9. Contains contact information and biographical sketches about the members of the United States Congress. Although the triggering effect of economic crises on revolt is a classic sociological topic, crises have until recently mostly triggered large-scale collective action in developing countries. The antigovernment protests that occurred in several European countries in the aftermath of the global financial crisis brought crises to the forefront of collective action research in democratic societies, as well as provide important opportunities for studying how crises can trigger large-scale collective action. This volume focusses on Iceland's 'Pots and Pans Revolution', a series of large scale antigovernment protests and riots that took place in Iceland in autumn 2008 and January 2009. The Icelandic case offers a rare opportunity to study processes that can trigger political protest in an affluent, democratic society. The protests took place in the aftermath of a national financial collapse triggered by the global financial crisis in early October 2008. While having almost no tradition of mass protest, Iceland was among the first countries to respond to the global crisis with large-scale protest. The level of public mobilization was exceptionally high (about 25 percent participation rate) and the protests did not stop until they had brought down the ruling government of Iceland. Using qualitative and quantitative data, this volume situates the protest in historical-cultural context and applies social movement theory to explore how the economic crisis ended up triggering the protests, thus providing a step toward understanding why the global financial crisis has triggered public unrest in other countries. Extreme Hydrology and Climate Variability: Monitoring, Modelling, Adaptation and Mitigation is a compilation of contributions by experts from around the world who discuss extreme hydrology topics, from monitoring, to modeling and management. With extreme climatic and hydrologic events becoming so frequent, this book is a critical source, adding knowledge to the science of extreme hydrology. Topics covered include hydrometeorology monitoring, climate variability and trends, hydrological variability and trends, landscape dynamics, droughts, flood processes, and extreme events management, adaptation and mitigation. Each of the book's chapters provide background and theoretical foundations followed by approaches used and results of the applied studies. This book will be highly used by water resource managers and extreme event researchers who are interested in understanding the processes and teleconnectivity of large-scale climate dynamics and extreme events, predictability, simulation and intervention measures. Presents datasets used and methods followed to support the findings included, allowing readers to follow these steps in their own research Provides variable methodological approaches, thus giving the reader multiple hydrological modeling information to use in their work Includes a variety of case studies, thus making the context of the book relatable to everyday working situations for those studying extreme hydrology Discusses extreme event management, including adaption and mitigation NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT--OVERSTOCK SALE -- Significantly reduced list price THE OFFICIAL CONGRESSIONAL DIRECTORY, 2005-2006: 109th Congress Author: U.S. Department of Congress The Official Congressional Directory 2005-2006: 109th Congress, published by the United States Congress, is the official source for making the right connections to Members of Congress, their key staff, and important contacts throughout the Federal Government. This authoritative and comprehensive reference source, designed for quick, easy access, is organized alphabetically by: • State Congressional Districts • Committee • Federal agency In addition to complete contact information for all U.S. Senators and Representatives and key staff, including addresses, telephone and fax numbers, and Web addresses, the Directory contains: • Brief biographies of Senators, members of Congress, and the Judiciary • All committee assignments • Handy maps of Congressional districts • A comprehensive listing of officials of executive agencies, the Federal Judiciary, international organizations, foreign diplomatic offices • Complete name index Jaká byla zahraniční politika České republiky v období 2007-2009 a proč? What was the Czech foreign policy like during the years 2007–2009 and why?
