Some issues, Aug. 1948-1954 are called: Radio-electronic engineering edition, and include a separately numbered and paged section: Radio-electronic engineering (issued separately Aug. 1954-May 1955). Provides lists of selling prices of items found on eBay in such categories as antiques, boats, books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games. Comprehensive and accessible, Elementary Information Security covers the entire range of topics required for US government courseware certification NSTISSI 4013 and urges students analyze a variety of security problems while gaining experience with basic tools of the trade. Written for the one-term undergraduate course, the text emphasises both the technical and non-technical aspects of information security and uses practical examples and real-world assessment tools. Early chapters in the text discuss individual computers and small LANS, while later chapters deal with distributed site security and the Internet. Cryptographic topics follow the same progression, starting on a single computer and evolving to Internet-level connectivity. Mathematical concepts throughout the text are defined and tutorials with mathematical tools are provided to ensure students grasp the information at hand. Rather than emphasizing memorization, this text challenges students to learn how to analyze a variety of security problems and gain experience with the basic tools of this growing trade. Key Features: -Covers all topics required by the US government curriculum standard NSTISSI 4013. - Unlike other texts on the topic, the author goes beyond defining the math concepts and provides students with tutorials and practice with mathematical tools, making the text appropriate for a broad range of readers. - Problem Definitions describe a practical situation that includes a security dilemma. - Technology Introductions provide a practical explanation of security technology to be used in the specific chapters - Implementation Examples show the technology being used to enforce the security policy at hand - Residual Risks describe the limitations to the technology and illustrate various tasks against it. - Each chapter includes worked examples of techniques students will need to be successful in the course. For instance, there will be numerous examples of how to calculate the number of attempts needed to crack secret information in particular formats; PINs, passwords and encryption keys. Some issues, Aug. 1943-Apr. 1954, are called Radio-electronic engineering ed. (called in 1943 Radionics ed.) which include a separately paged section: Radio-electronic engineering (varies) v. 1, no. 2-v. 22, no. 7 (issued separately Aug. 1954-May 1955). This document describes a digital computer program developed to simulate an Electro-Motive Division (EMD), Model 20-645E-4, two-cycle, turbocharged, 2500 kw diesel engine-generator set manufactured by General Motors Corporation. This program has been used to simulate the performance of the engine-generator set during exposure to environmental and load transients. The model of diesel engine performance is sufficiently detailed to evaluate the thermodynamic state within each cylinder, in the inlet and exhaust manifolds, and at the entrance and exit of the turbocharger components at each instant of time. The pressure forces acting on each piston are translated through appropriate kinematic and dynamic relations to shaft output torque. In all the United States, New Mexico is unmatched for the depth of its traditions, its history, and for its multicultural network. The state is a veritable laboratory for study of the ways groups have met and influenced one another. This bibliography provides a fairly inclusive but far from complete listing of the best published sources testifying to New Mexico's record of cultural continuity and intercultural mingling. Many good readings not listed are either unpublished, difficult to obtain or more technical than the readings offered. This is a photography book, and although some tips are offered to aid others in similar photography, it is not an instruction manual. Since the beginning of my memory I have always been fascinated with the sky and everything contained therein. Clouds, stars, moon and even the sun have always garnered my consistent attention and many hours both day and night I have stood captivated starting into the sky. As one my expect this volume contains photographs of the sky and its occupants, clouds, moon, sun in various combinations as presented by nature and any other entity who may claim responsibility for such a marvelous scene. I bow to all of you. For those interested in hardware and technique I will say that most of thee images were taken with a Nikon D600 fitted with a 500MM preset lens, a Nikon D5100 that has been converted to see in infrared and fitted with a 24-120MM Nikkor zoom lens. A few of them were even taken on film with a Pentax 645 fitted with various lenses. Can you imagine that, film! Ah, the film used was either Kodax Ektar 120 for the color work or Kodax TMAX-100 for the monochrome. In all cases a tripod was used. It really doesn't matter which brand as any good tripod will serve you well. Mine was a Manfroto fitted with a ball head. In all cases the camera was fired in a mirror up state with a cable release. Exposures varied between 1/30 - 1/125 of a second at f16 at iso 200 - why f16? The particular 500MM lens I used had an f-setting range of f8 through f32 and f16 is the sharpest setting for this individual lens. Vibration is not the only issue When shooting at night for all about your in camera light meter. O be aware of. Atmospheric conditions can plan a profound roll in the clarity of your images and cannot always be observed until examining the final images. If your images are not as sharp as you would like keep trying and remember that the atmosphere is less dense straight up than at the horizon. The vast difference between the bright moon an the black sky will render it all but useless. Try 1/30 sec at f16 or a combination thereof. One last thing of note. A 500MM lens is extraordinarily sensitive. So wait 5 to 10 seconds after you trip mirror up before you trip the shutter. Even a healthy breeze can ruin the sharpness of your images. I hope you enjoy the work contain herein. The German novelist, poet and critic W. G. Sebald (1944-2001) has in recent years attracted a phenomenal international following for his evocative prose works such as Die Ausgewanderten (The Emigrants), Die Ringe des Saturn (The Rings of Saturn) and Austerlitz, spellbinding elegiac narratives which, through their deliberate blurring of genre boundaries and provocative use of photography, explore questions of Heimat and exile, memory and loss, history and natural history, art and nature. Saturn's Moons: a W. G. Sebald Handbook brings together in one volume a wealth of new critical and visual material on Sebald's life and works, covering the many facets and phases of his literary and academic careers -- as teacher, as scholar and critic, as colleague and as collaborator on translation. Lavishly illustrated, the Handbook also contains a number of rediscovered short pieces by W. G. Sebald, hitherto unpublished interviews, a catalogue of his library, and selected poems and tributes, as well as extensive primary and secondary bibliographies, details of audiovisual material and interviews, and a chronology of life and works. Drawing on a range of original sources from Sebald's Nachlass - the most important part of which is now held in the Deutsches Literaturarchiv Marbach - Saturn's Moonsög will be an invaluable sourcebook for future Sebald studies in English and German alike, complementing and augmenting recent critical works on subjects such as history, memory, modernity, reader response and the visual. The contributors include Mark Anderson, Anthea Bell, Ulrich von Buelow, Jo Catling, Michael Hulse, Florian Radvan, Uwe Schuette, Clive Scott, Richard Sheppard, Gordon Turner, Stephen Watts and Luke Williams. Jo Catling teaches in the School of Literature at the University of East Anglia and Richard Hibbit in the Department of French at the University of Leeds.
